FOR IMMEDIATE RELEASE

**TBEFacts.com Features Latest Information for Canadians on Preventing Tick-Bourne Encephalitis
- Resource most useful for those hiking in Europe and Central Asia -**

MISSISSAUGA, ON, Canada and CAMBRIDGE, MA, USA—August 6, 2010—[Theramed Corporation](#) and Body1, Inc. announce the re-launch of a novel web site informing Canadians about Tick-Borne Encephalitis (TBE) at <http://www.tbefacts.com>. Theramed partnered with Body1 to enhance this unique online resource for overseas travelers.

TBE is a viral disease transmitted by ticks that attacks the nervous system and can result in long-term neurological symptoms and even death. TBE can cause both mild and severe illnesses, with permanent consequences such as concentration problems, paralysis, and depression. Approximately 2% of cases result in the death of the affected person. Vaccination against TBE is recommended for persons planning to travel to areas where the disease is endemic. These areas of risk include much of Europe and large areas of Central Asia, Siberia, and Japan.

The new TBEFacts website features detailed information about TBE, such as tick life cycles, endemic areas, and clinical data. [TBEfacts.com](#) also includes resources on travel health, a locator for Canadian health clinics, and information on a preventative vaccine, called [FSME-IMMUN](#)[®]. The site was redesigned, coded, optimized, and is being managed by [Body1](#) of Cambridge, MA, USA, a leader in hosted health sites.

About Theramed Corporation

Theramed Corporation (<http://www.theramed.com>), headquartered in Mississauga, Ontario, is focused on excellence in commercialization of both new-to-market and well-established healthcare solutions to Canadian Physicians and Hospitals, be these solutions Pharmaceutical products, Biotech innovations, or Medical Devices.

*Theramed is proud to introduce **FSME-IMMUN**[®], the only TBE vaccine licensed and available in Canada. This vaccine has been shown to be highly effective at producing immunity to TBE in clinical studies.*
